PANAMA CITY, October 20, 2011 – Banco Latinoamericano de Comercio Exterior, S.A. (NYSE: BLX, “Bladex”, or “the Bank”) announced today its results for the third quarter and nine months ended September 30, 2011.

- On a year-to-date basis, the Bank’s Net Income totaled \$58.4 million, a \$31.7 million, or 118%, increase from 2010, driven by improved performance across all of the Bank’s business lines.

- The Commercial Division's continued growth in Net Income was driven by net operating revenues of \$30.0 million, 42% higher than the same period 2010, and 27% higher than the second quarter 2011. The increase during the quarter was driven by portfolio growth and diversification, along with increased commission income.

**Commercial Division - Net Operating Revenues**  
(In US\$ million)

- The Commercial Portfolio reached \$5.6 billion, a \$1.4 billion, or 34%, year-on-year increase, and a \$371 million, or 7%, increase from the previous quarter, while average portfolio balances grew 11%.

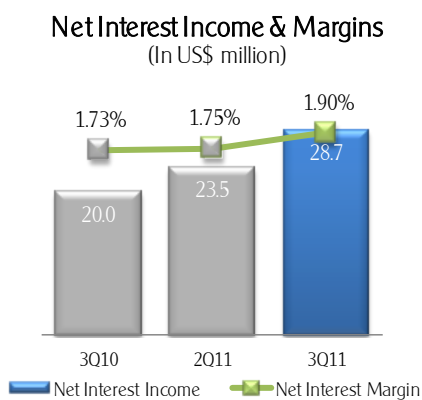

**Commercial Portfolio**  
(End of period balances, In US\$ million)

- As of September 30, 2011, the non-accrual portfolio stood at \$33.1 million, or 0.7% of the loan portfolio, compared to 0.9% a year ago. The Bank reported no past-due amounts and all loans in non-accruing status were current. As of September 30, 2011, the ratio of the allowance for credit losses to the Commercial Portfolio was 1.7%, compared to 2.3% as of September 30, 2010, and 1.8% as of June 30, 2011.
- In the third quarter 2011, the Treasury Division reported Net Income of \$2.0 million, compared to a \$1.5 million Net Loss in the same period 2010, and \$1.1 million in Net Income in the second quarter 2011. Net Income in the third quarter 2011 was mainly attributable to gains on sales of securities.
- As of September 30, 2011, the Bank's deposit balances totaled \$2.5 billion, a new historical high, representing a 34% year-on-year increase, and a 20% increase from the previous quarter.

- Net interest income amounted to \$28.7 million in the third quarter 2011, an \$8.7 million, or 43%, increase compared to the third quarter 2010, and a \$5.2 million, or 22%, increase compared to the second quarter 2011. The results were driven by higher average interest-earning assets (+31% versus third quarter 2010 and +12% versus second quarter 2011), as well as an improved net interest margin (up 17 bps from the third quarter 2010, and 15 bps higher than the second quarter 2011).

- During the third quarter 2011, the Asset Management Unit reported a Net Loss of \$3.3 million, mainly due to mark-to-market losses on long positions in Latin American currencies and Latin American short-term sovereign credits incurred late in the quarter during increased market volatility. On a year-to-date basis, Bladex's investment in the Bladex Capital Growth Fund (BCGF, the Investment Fund, managed by this Unit), contributed Net Income of \$11.5 million to the Bank, compared to a Net Loss of \$8.1 million in the same period 2010.
- As of September 30, 2011, the Bank's Tier 1 capital ratio was 16.9%, compared to 20.6% as of September 30, 2010, and 18.1% as of June 30, 2011, as the Bank continues deploying capital through growth. The Bank's equity consists entirely of issued and fully paid ordinary common stock.

## CEO's Comments

Mr. Jaime Rivera, Bladex's Chief Executive Officer, stated the following regarding the Bank's results: "The third quarter saw the Bank's business shift into high gear. In just three months, net interest income grew 22%, fees increased 93%, deposits were up 20% to reach an all-time high, while the Commercial Portfolio grew 7%. Concurrently, liquidity strengthened and credit quality remained strong.

The Asset Management Division, however, posted a \$3.3 million loss during what is widely viewed as one of the most volatile quarters in recent years, but still remains comfortably ahead year-to-date with a Net Income contribution of \$11.5 million in 9M11.

By supporting clients at a difficult time in the market, Bladex is strengthening its franchise and proving once more the Bank's strategic value to the Region. With its ample capitalization supporting sustained growth, Bladex has been able to steadily increase margins, ROA and ROE levels within its core intermediation and client business, even while the world economy slows.

Bladex is keenly aware of the increasing risk levels in the markets, and has taken measures to protect the Bank accordingly - this is something we know how to do quite well. Crucially, however, the Bank has strengthened its position as a uniquely qualified specialist in the intermediation of Latin America's growing trade flows, which continue supplying the global demand for food, commodities, and energy. This is a great position in which to be, and the reason why Bladex is so confident with regards to the Bank's prospects moving forward."
